

## Projectmogelijkheden India - Mysore

### Orphanage

Orphanages in India have few resources and staff for all the kids they have to look after, so they need lots of help from volunteers to making them brighter, happier places to live. As a volunteer in an orphanage project, you can get involved in all sorts of things on these projects from building maintenance to care to teaching English.

Most orphanages in India have integrated on their grounds their own primary (and secondary) school for their pupils. The school is also open for poor families. Of course the orphanage provides housing, food and teaching materials for these poor students as well. Activities can include a combination of:

-  Teaching English on a non formal basis
-  Creating activities for the students including workshops for cultural exchange
-  Art & Handicraft activities
-  Sports after classes
-  Environmental awareness activities (Clean Up the World)
-  Basic construction to improve the children's livelihoods

### Medical project

You can do a Medical Project in India in Medicine, Physiotherapy, Nursing, Midwifery or Dentistry. If you are embarking on a career in medicine, then this project is the perfect experience for you. With a wide range of activities with various levels of skills and experience, you can be sure of a varied and in-depth internship from which you will gain a greater appreciation and understanding of the challenges facing medical and health professionals in a country such as India. Volunteers will be placed in a hospital in Bangalore/ Mysore or Goa where they will have to report for duty according to shift personnel (Day/Night). If you wish to do your elective in India, you are sure to have an unusual yet very rewarding experience. There are also many opportunities to work in Maternity clinics as well as in multi-specialty hospitals. The breadth of knowledge and experience that you will receive in India is quite incredible; you will be working with doctors who enjoy the opportunity to impart their specialized knowledge to enthusiastic students. If you come with a medical background, you will be given more responsibility and the potential to get more hands-on work.

### Teaching project

Education is probably the most important tool in development. Therefore, volunteers are invited to teach English & Special Education in a self- chosen fashion to the local children at a primary school, as well as at center premises during & after school activities. Whether you are a qualified teacher or simply interested in helping kids abroad, we have volunteer teaching opportunities at local schools. Participants should have a good level of English and some knowledge and prior experience in teaching is appreciated, but not necessary. You have to love children, as you will be surrounded with loads of them every day. The mission of this project is multi-fold:

- Teaching English is the main task, but also other subjects, such as arts and crafts or sports like football, hockey, cricket and athletics.
- Motivating the children to learn
- Instilling social, psychological and physical security to the children
- Interactions with the children
- Assist local Teachers and make lesson plans
- Create social awareness among the kids especially concerning the environment, kindness etc.
- Teach kids to sing/ dance
